

About me

I am working as an IT teacher in Spain for several years. Before that, I was some years working in the private industry as a software engineer.

Some time ago, I created an app called "**Apolo**", for the old PDAs with **Windows Mobbile** (published on [Observatorio Tecnológico del Ministerio de Educación y Ciencia](#)).

Now, in my spare time I am developing a new version of "Apolo" for Android called "**Teacher Gradebook**", I use it in my daily lessons.

I do not get any external funds. I get funded with the app's adverts and with users that want to become premium.

Greetings

Fran
