

# How to run the app on a PC

There are some free emulators to run Android apps from Google Play Store:

- **NoxPlayer:** <https://bignox.com/>
- **Bluestacks:** <http://www.bluestacks.com/>
- **Andy:** <http://www.andyroid.net/>
- **Leapdroid:** <http://leapdroid.com/>

You must download and install one of them in your PC or laptop. After that, run the emulator, go to Google Play store and download the app.
